

How to install a Valve Reducer on a Smoky Lake Water-Jacketed Bottler

1. Remove the valve from your bottler.
2. Unscrew the top of the valve to remove the handle as shown in the photo above.
3. Insert the valve reducer, tapered end down, into the spout. Force the tapered end through the opening using a blunt object such as the handle of a screwdriver. Please use care not to accidentally injure yourself during this step.
4. Reassemble the valve, screwing the handle back onto the spout, then screwing the valve back onto your bottler.
5. If you run into any problems, feel free to call or email Jim. (920) 202-4500 or jim@smokylakemaple.com

Smoky Lake Maple Products offers of full line of high quality maple equipment.
