

# How to Loosen Up a Smoky Lake Ball Valve

## **INSTRUCTIONS:**

If the handle on your Smoky Lake Stainless Steel Ball Valve is tighter than desired, there is a very easy way to loosen it up. Simply add a dab of vegetable oil to the inside ball joint as indicated in the photo. Work the handle back and forth and the handle will begin to swing with greater ease. You do NOT need to disassemble the valve. Just a little dab of veggie oil should do the trick!
